Description

A dental hygienist is a licensed member of the dental healthcare team who provides educational, clinical, and therapeutic services to their patients within the scope of their state Dental Hygiene Practice Act. A dental hygienist provides dental care with a focus on disease prevention. Dental hygienist patient care includes collection of assessment data to create a treatment plan, implementation of care, and evaluation of the treatment provided.

To practice dental hygiene, graduates are required to pass a national board examination on the theory of dental hygiene and a clinical board examination on the clinical practice of dental hygiene. Application for licensure must be made to the individual state(s) where the applicant intends to practice.

In the educational curriculum, the dental hygiene student learns critical thinking skills to develop professional judgement, ethical conduct, and prevention of disease transmission by utilizing infection control guidelines. Students develop communication skills for healthcare professionals, which enable them to engage the patient as a partner in their own oral healthcare. They learn all aspects of documentation and standard chart entries, which are considered the standard in the profession. Students provide care to a broad range of patients with a variety of systemic health conditions on campus at the City Tech patient care clinic.

Mission

Aligning with the Mission Statement and educational goals of the college, City Tech's Dental Hygiene Program is committed to academic excellence while providing accessibility and equity through an inclusive and welcoming learning environment. Our program appreciates the distinctiveness of our culturally and ethnically diverse student body and considers each learner's unique potential as future dental hygienists and their impact on the public's oral and overall health. Our mission is to foster influential professionals devoted to lifelong learning, who can address real-world oral health issues using critical thinking and reasoning skills, evidence-based practices, and emerging technologies, and are motivated to contribute to the field of research, academics, and interprofessional collaboration.

To support our mission, the educational program at CityTech:

- O◈ers a course of study that integrates various fields of study and is grounded in research, reflecting modern practices in health care.
- Inspires a passion for scientific inquiry and lifelong learning in dental hygiene students so that they may contribute to the advancement of the field and its practice.
- Promotes the appreciation of good oral and systemic health though clinical education based on a preventative strategy, with the ultimate objective of reducing oral health inequities.
- Educates future dental hygienists to practice ethically and professionally while providing patient-centered, comprehensive dental hygiene treatments supported by evidence.
- O◈ers students the opportunity to participate in community service initiatives that further the goals of their educational institution, their profession, and society at large.

Degree Programs

The associate in applied science in DH-AAS requires completion of 66-67 credits, including general education credits (27-28) and program-specific course credits (39). After completion of the educational program, graduates will be eligible to take the series of licensing examinations, namely the National Dental Hygiene Board Examination (NDHBE) and the CDCA-WREB-CITA Examination. Application for licensure must be made to the individual state(s) where the applicant intends to practice.

Information on New York State licensure in Dental Hygiene is available at the NYS O◈ce of Professions website: https://www.op.nysed.gov.

Special Opportunities

The Dental Hygiene Department has the support of the Jewish Foundation for Education of Women (JFEW) and students in the clinical program who meet the scholarship criteria may apply.

Students have the opportunity to attend or participate in the Greater New York Dental meeting and the National Day for Give Kids a Smile.

Accreditation

City Tech's Dental Hygiene Program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611. The Commission's web address is: **https://coda.ada.org.**

Advisory Commission

Nancy Ryan Barnes, Dental Hygienist, NYS Board for Dentistry/Dental Hygienists Association of the State of NY
Rita Bilello, Dentist, Oral Health Center for People with Disabilities, New York University College of Dentistry
Monique Blake, Assistant Registrar, New York City College of Technology
Reneta Budny, Associate Professor, NYCCT Restorative Dentistry Department (Former Chairperson)
Anaika Forbes Grant, Manager, Community Oral Health, Colgate-Palmolive
Daniel Lopez, Dental Hygienist, Callen-Lorde Community Health Center
Isis March, RDH, Assistant Professor, Hostos Community College - CUNY
Reneida Reyes, Pedodontist, NYS Board for Dentistry, Second District Dental Society, Long Island Odontology
Gregory Senat, Dental Hygiene/Adjunct Clinical Instructor, NYU - Adjunct Clinical Instructor/New York Presbyterian- Queens- Dental Hygienist
Amanda Sullivan-Lalli, Director, Enrollment Registrar Specialist, New York City College of Technology

Program Description

Dental Hygiene Profession

A dental hygienist is a licensed member of the dental healthcare team who provides educational, clinical, and therapeutic services to their patients within the scope of their state Dental Hygiene Practice Act. Patient care provided by a Dental Hygienist includes collection of assessment data and creating a treatment plan, implementation of care, and evaluation of the treatment provided.

Educational Program

In the educational curriculum, the dental hygiene student learns critical thinking skills to develop professional judgement, ethical conduct, and prevention of disease transmission by utilizing infection control guidelines. Students develop communication skills for healthcare professionals, which enable them to engage the patient as a partner in their own oral healthcare. They learn all aspects of documentation and standard chart entries, which are considered the standard in the profession. Students provide care to a broad range of patients with a variety of systemic health conditions on campus at the City Tech patient care clinic. After completion of the educational program, graduates are eligible to take the series of licensing examinations, namely the National Dental Hygiene Board Examination (NDHBE) and the CDCA-WREB-CITA Examination.

Professional Roles

Among the employers of the graduates of this program are private dental practices, public and private health agencies, hospitals, industrial clinics, government agencies, U.S. Armed Services, schools of dentistry and dental hygiene and dental supply companies. Dental hygienists hold an integral role in assisting individuals and groups in attaining and maintaining optimal oral health. They provide educational, clinical and consultative services to people and populations of all ages in diverse settings and capacities. The professional roles of the dental hygienist include the following categories:

- **Clinician:** Dental hygienists in a clinical role assess, diagnose, plan, implement, evaluate, and document treatment for prevention, intervention, and control of oral diseases, while practicing in collaboration with other health professionals. Hygienists are employed in private dental offices, community clinics, hospitals, university dental clinics, prison facilities, nursing homes, and schools.
- **Public Health:** Community health programs are typically funded by government or nonprofit organizations. These positions often offer an opportunity to provide care to those who otherwise would not have access to dental care. Educational requirements vary. As more community health programs emerge, the need for dental hygienists with advanced education and training is necessary. These positions may require a bachelor's degree.
- **Researcher:** Hygienists are employed as researchers work in colleges and universities, corporations, governmental agencies, and nonprofit organizations. Education requirement is a bachelor's degree; however a graduate or doctoral degree is preferred.
- **Educator:** Dental hygiene educators work in colleges and universities as clinical or classroom instructors and program directors. They can also work as corporate educators. Many dental hygienist educators have Master or PhD degrees.
- **Administrator:** Hygienists employed as administrators work as clinical directors, program directors of dental hygiene educational programs, and research administrators. Educational requirements vary by position; however, most require a graduate or doctoral degree.
- **Corporate Empoyee:** Hygienists are hired as sales representatives, product researchers, corporate educators, and corporate administrators.
- **Entrepreneur:** Dental hygienists can become successful entrepreneurs in a variety of businesses, including consulting and continuing education, product development and sales, practice, and nonprofit organization management. Educational requirement is an entry-level (associate or bachelor) degree.

Learning Outcomes

- Develop knowledge and clinical skills to be competent in providing dental hygiene care and to facilitate the desire to continue learning new clinical advances in patient care.
- Acquire and use the professional dental hygiene skills needed for communication, inquiry, analysis, and clinical excellence.
- Work collaboratively within and across health care disciplines to provide optimal patient care outcomes.
- Evolve dental hygiene professional skills to promote humanistic, ethical, and legal standards of care when treating patients from diverse socioeconomic, educational, and cultural backgrounds within the community.

Licensure Information

Dental Hygiene students obtain the practicum hours necessary for dental hygiene licensure at City Tech on campus in the patient care clinic. All patient care is provided under the supervision of licensed dental Hygienists and dentists. To practice dental hygiene, graduates are required to pass a national board examination on the theory of dental hygiene and a clinical board examination on the clinical practice of dental hygiene. Application for licensure must be made to the individual state(s) where the applicant intends to practice.

Graduates of the New York City College of Technology Dental Hygiene program are eligible to take licensing examinations, including the National Board Dental Hygiene Examination (NBDHE) and the American Board of Dental Examiners (ADEX). The Joint Commission on National Dental Examinations (JCNDE) is the governing body for the NBDHE, working in collaboration with the Department of Testing Services (DTS). ADEX is an independent testing agency that administers the ADEX dental and dental hygiene clinical licensure examinations. Upon satisfying the licensing requirements, graduates may apply for licensure in any of the US jurisdictions listed here: https://adextesting.org.

Accreditation

NYCCT Dental Hygiene Program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611. The Commission's web address is:**https://coda.ada.org**.

Additional Costs

There are additional costs associated with the Dental Hygiene program that are not covered by Financial Aid. They include:

ITEM	COST
National Board Dental Hygiene Examination (NBDHE)	$600
Clinical Examination (ADEX/CDCA)	$1150
NYS Dental Hygiene license– initial application	$128
NYS Dental Hygiene Anesthesia certification	$25
Professional membership in Student American Dental Hygienists' Association (SADHA)	$85 per year
Instruments and supplies	approximately $3000
Textbooks	approximately $1000
Uniforms	approximately $200

Advisement Information

Up-to-date detailed Dental Hygiene advisement information is available on the department website. Prospective new and transfer students should review the program information and FAQ and request program advisement with one of our faculty advisors.

Explore the Dental Hygiene Department on the City Tech website.

Requirements

Simple Requirements

(No Requirement Levels)

Admission Requirements

Type
Completion Requirement

All new and transfer students must first complete the required six prerequisite courses to be considered for acceptance into the dental hygiene program. During the introductory courses sequence, students will register for courses in general education and science, which are required for the degree in dental hygiene.

Required pre-requisite courses:
ENG1101 English Composition I or ENG1101CO ENGL Composition I Corequisite or ENG1101ML Eng Comp w ESOL Corequisite
MQR – Mathematical and Quantitative Reasoning (3-4 credits)
SOC1101 Elements of Sociology
BIO2311 Human Anatomy and Physiology I
BIO2312 Anat & Physio 2
CHEM1000 Principles of Chemistry or higher

Students will be considered for acceptance into the clinical program during the Fall semester if they:

- Are CUNY proficient in writing and math and proficient at or above the 12th grade level in reading.
- Have completed the 21 or 22 required general education credits with at least a C in biology and chemistry and a minimum combined average of 2.5. Grades in repeated courses will be averaged.

Available seats in the clinical program are allocated based on the highest cumulative academic averages in the required 21/22-credit sequence. Seats are offered up to the limit authorized by the college. Students who do not meet the above requirements for progression from the pre-clinical sequence to the clinical program by the end of four semesters are required to transfer out of the dental hygiene curriculum.

Completion of the introductory courses does not guarantee progression into the clinical program. Because of capacity limitations, students who have completed the introductory phase with the minimum 2.5 index or higher will be numerically ranked each semester and seats will be allocated based on the highest cumulative average in the introductory sequence, as space permits. Due to the high number of applicants to the dental hygiene program over the last several years, the average GPA, for acceptance to the program has been approximately 3.4 or higher.

General Education

Type
Completion Requirement

Required Common Core

Fulfill ALL of the following requirements:

English Composition

Complete ALL of the following Courses:
- ENG 1101 - English Composition I
  OR ENG 1121 - English Composition II

If both ENG1101 and ENG1121 are available, the higher grade will be accepted for GPA calculation.

AND

Mathematical and Quantitative Reasoning

Complete at least 1 course in the following course sets:
- Required Core Mathematical and Quantitative Reasoning

AND

Life and Physical Sciences

Complete ALL of the following Courses:
- BIO 2311 - Human Anatomy and Physiology I

Prerequisites for BIO 2311: BIO 1101 with a minimum grade of C, a college-level general biology course with lab, or a score of 85 or above on the biology Regents exam (with lab). CUNY Proficiency in reading and writing.

Flexible Common Core

Bachelor's degrees and AA and AS degrees require six flexible common core courses: at least one course in each of the five flexible core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one area. AAS degrees may require fewer overall flexible core credits.

Fulfill ALL of the following requirements:

Scientific World

Complete ALL of the following Courses:
- BIO 2312 - Human Anatomy and Physiology II

AND

Individual and Society

Complete ALL of the following Courses:

- PSY 1101 - Introduction to Psychology
- SOC 1101 - Elements of Sociology

Some courses that are required for the major also meet general education requirements. Choosing to take advantage of double duty can speed up progress toward graduation and increase elective credits. In DegreeWorks, a double duty course displays and fulfills both requirements, but the credits count only once; the elective area will adjust automatically. Specific options for double duty courses are listed here and noted in the degree map below.

Writing Intensive

Students at New York City College of Technology must complete two courses designated writing intensive (WI) for the associate level, one from general education requirements and one from the major.

Transfer students and those who have earned a prior degree may have part or all of this requirement waived; please consult the Degree Requirements page for additional information.

Progression and Graduation Requirements

Type
Completion Requirement

- A minimum grade of C in each course designated with the prefix DEN is required for progression in and graduation from the dental hygiene program.
- DEN 1100 may not be repeated in the event of failure or a grade of “D” and the student will be required to choose another major.
- Students who withdraw will be considered for readmission on an individual basis only if they withdraw in good standing (passing all courses at time of withdrawal).
- No dental hygiene course may be repeated more than once. In addition:
  - No more than two dental hygiene courses may be repeated during the entire course of study.
  - A student may not fail more than one course in any one semester.
- If a student fails to meet any of these provisions, they will be required to withdraw from the dental hygiene curriculum.

Students must complete all requirements for the AAS degree within five years of the date of their matriculation into the dental hygiene program.

Grading Policy for all DEN courses:

DEFINITION	GRADE
93-100%	A
90-92.9%	A-
87-89.9%	B+
83-86.9%	B
80-82.9%	B-
77-79.9%	C+
75-76.9%	C
60-74.9%	D
Below 60%	F

Clinical Policies and Procedures

Once students are admitted to the clinical phase of the program, they must comply with all program policies and procedures.

Attend Classes: All Dental Hygiene classes (lectures/laboratories/ clinics) are in-person only. The dental hygiene program runs under a block schedule; students must take the courses in the order in which they are given. The program offers a day and evening options; students are given the opportunity to state a preference during the application process. Due to limited clinic space and faculty to student ratio, students cannot switch between day and evening sections while in the program.

Day Students: Fall and Spring sessions are full-time. Students need to be flexible Monday to Friday between the hours of 7:30 am and 6 pm.

Evening Students: Fall, Spring, and Summer (June or July) sessions as a full-time student. Students need to be flexible Monday to Friday between the hours of 5 pm and 10 pm, as well as Saturday from 8 am to 5 pm.

Vaccinations: Submit documented evidence of a complete physical examination demonstrating good health. The First and Second-Year Student Medical Examination Form is provided by the department. Students are responsible for satisfying NYS immunization and department immunization requirements to be permitted into the clinical portion of the courses to meet CDC guidelines for Health Care Providers. These include:

- T-dap
- Varicella
- MMR
- Hepatitis B (if in-progress, documentation must be provided)
- Influenza - annually
- Tuberculosis baseline screening - blood test (skin test not accepted)

Any missing or incomplete immunizations will void the student from clinical participation and prevent them from entering the program.

Bloodborne Pathogens: As a healthcare provider, you will have the potential for exposure to respiratory and bloodborne pathogens. Dental hygienists encounter saliva and blood while working on patients. Bloodborne pathogens are infectious microorganisms in human blood that can cause disease. The most common bloodborne pathogens are

Hepatitis B, C & HIV. How to manage bloodborne pathogens is taught to dental hygiene students to help protect everyone against occupational transmission of bloodborne disease.

Required Courses in the Major

Type
Completion Requirement

Complete ALL of the following Courses:

- BIO 2311 - Human Anatomy and Physiology I
- BIO 2312 - Human Anatomy and Physiology II
- BIO 3524 - Nutrition
- BIO 3302 - Microbiology
- COM 1330 - Public Speaking
  OR COM 1320 - Voice and Diction
- DEN 1100 - Principles of Dental Hygiene Care I
- DEN 1112 - Oral Anatomy
- DEN 1114 - Histology and Embryology
- DEN 1200 - Principles of Dental Hygiene Care II
- DEN 1217 - Periodontics
- DEN 1218 - Dental Radiology
- DEN 2300 - Principles of Dental Hygiene Care III
- DEN 2311 - Oral Pathology
- DEN 2315 - Pharmacology
- DEN 2318 - Dental Materials
- DEN 2400 - Principles of Dental Hygiene Care IV
- DEN 2413 - Introduction to Public Health
- PSY 1101 - Introduction to Psychology
- SOC 1101 - Elements of Sociology

Note: COM 1330 meets NYS Liberal Arts and Sciences requirements. COM 1320 is not a liberal arts and sciences class. Students who choose COM 1320 may need three additional credits to complete a bachelor's degree.

Complete ALL of the following Courses:

- CHEM 1000 - Principles of Chemistry

or higher Chemistry course

Overall Requirements

Type
Completion Requirement

Complete at least 20 credits of liberal arts and sciences

Complete a minimum of 30 credits in residence at New York City College of Technology, at least 15 of which must be from among those listed as required courses in the major

Earn at least 66-67 credits

Courses

DEN 1100 - Principles of Dental Hygiene Care I (4 cr)

General

Course Title
Principles of Dental Hygiene Care I

Description
An introduction to the didactic concepts and clinical techniques and principles involved in the practice of dental hygiene. Emphasis is on the principles of optimal patient care including aseptic techniques, patient assessment, personal oral hygiene and plaque control, fundamentals of instrumentation and related body mechanics, principles of instrument sharpening and emerging modalities.

Is this course always writing intensive?
